

Amendments to the Drawings:

In FIG. 5, the labels for Low/B and Rev/B are moved for clarity.

In FIG. 8, the labels for Damp1 and Damp2 are reversed to conform to the specification, and the labels for Rev/B and Hi/B are moved for clarity.

Attachments: Two (2) replacement drawings sheets including sheet 3/13 replacing original sheet 3/13 and containing FIGS. 4 and 5 and sheet 5/13 replacing original sheet 5/13 and containing FIGS. 8 and 9

### **REMARKS**

In the Office Action dated August 28, 2008, the Examiner indicates that the application contains claims directed to more than one species of the generic invention, and the species lack unity of invention because they do not form a single inventive concept under PCT Rule 13.1. Accordingly, the Examiner requires election of a single one of the following species for examination:

- 1) Species 1: FIG. 2;
- 2) Species 2: FIG. 5;
- 3) Species 3: FIG. 8;
- 4) Species 4: FIG. 12;
- 5) Species 5: FIG. 17;
- 6) Species 6, FIG. 20; or
- 7) Species 7, FIG. 23.

Applicants have amended claims 1, 5, 11, 13, 15 and 18-20 to correct typographical and/or grammatical errors. Applicants elect species 1, FIG. 2, without traverse. Claims 1-9 are readable on the elected species.

In addition to the foregoing, Applicants have noted a number of typographical and/or grammatical errors in the specification as originally filed. To correct these errors, Applicants submit herewith a Substitute Specification including the corrections. A redline/strikeout version of the specification showing the changes made to the original specification that are included in the Substitute Specification is also attached. As can be seen, the proposed changes merely correct these errors and provide additional clarity by conforming the corrected portions of the specification to the remainder of the specification and to the drawings and claims as filed. Entry of the Substitute Specification is respectfully requested.

Applicants have also made corrections to FIGS. 5 and 8 as shown in the attached corrected drawing sheets. In FIG. 5 the labels for Low/B and Rev/B and in FIG. 8 the labels for Rev/B and Hi/B are each moved closer to the recited elements for clarity. Also in FIG. 8, the labels for Damp1 and Damp2 are reversed to conform to the specification at paragraph [0074]. Applicants respectfully request entry of the corrected drawing sheets.

Applicants submit that no new matter is added to the application as filed.

Consideration of the application as amended is respectfully requested.

The Examiner is invited to contact the undersigned at the telephone number listed below if the Examiner believes an Examiner's amendment would expedite prosecution of the application.

Respectfully submitted,

YOUNG BASILE HANLON  
MACFARLANE & HELMHOLDT, P.C.
